

Experience the Power of AVEVA's Full Portfolio

THE FUTURE IS NOW

## 28th Annual X-Change User Conference

THE MOST PRESTIGIOUS EVENT OF ITS KIND

Industry 4.0 has brought many opportunities and challenges. The digital era has promised better performance, improved production and efficiency and increased profitability. The global pandemic exacerbated production and supply chain challenges but also helped progress digital transformation. At X-Change we will show you how to grab these opportunities, overcome the challenges and become the architect of your organisation's operational technology drivers. Explore how to design, test, **create**, control, analyse and improve your plant down to the most remarkable detail and operation with AVEVA software and our local expertise. Acquire knowledge from industry experts, to **enable** your team, engage with strategic thinkers, and be **empowered** by the success stories of your peers.

Let's Take You There

### The X-Change Experience

### Why X-Change?

The X-Change user conference was conceived to continually showcase the latest innovations and trends which set out to simplify and revolutionise the development of high performance applications, add value and improve efficiency in your business. It is also, quite literally, an X-Change of knowledge. We created an event where we bring in

local and international speakers of note, a series of industry-specific and end-user presentations, peers across all industries, and of course, the Collaboration Expo where delegates can meet the hardware and software vendors who can make their life simpler and more productive. We bring AVEVA to Africa, and take African experiences to the world.

X-Change sets the stage for the FUTURE.
